THE EDOX HISTORY

CHRISTIAN RUEFLI-FLURY

FOUNDER OF EDOX

- 1860 Born in Courrendlin (Switzerland), son of a foundry master. Educated in Courrendlin.
- 1870 Moved to Grenchen (Switzerland). Commenced horology apprenticeship with Urs Schild, one of the great Master Watchmakers, before joining the Eterna watch company.
- 1883 Married Pauline Flury. Worked for Jean Ægler - watchmaker in Biel/Bienne until 1883.
- 1884 Founded his own watchmaking atelier in Biel/Bienne. Principal founder of the Lake Biel-Bienne Steam Boat Company and originator of the Evilard funicular and the Wildermeth Hospital in Biel/Bienne. Made numerous significant donations to regional hospitals and to children's nurseries in Biel/Bienne and gave monetary support to retirement homes and sanatoriums for the hard of hearing.

**1884****IT ALL BEGAN WITH
A TRUE LOVE STORY**

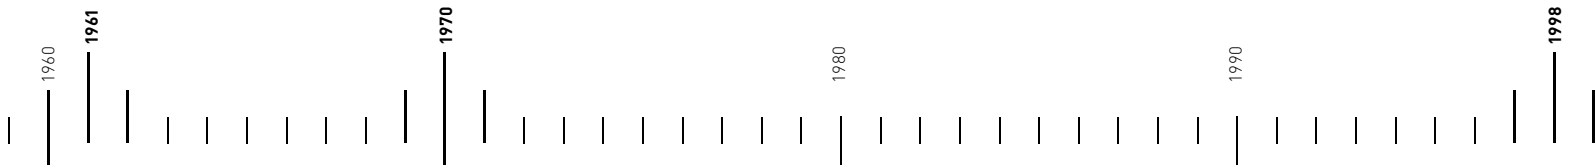

Christian Ruefli-Flury, a highly talented and romantic watchmaker "Maître-Horloger" from Grenchen in Switzerland, produces a pocket watch for the 25th birthday of his beloved wife Pauline. Impressed by this exquisite gift, she convinces her husband to set up his own watch making company in Biel, a city famous for its well-educated watch engineers. Christian Ruefli-Flury called his company "Edox" which means "measuring of time" in ancient Greek.

**1900****THE BIRTH OF A LOGO**

The hourglass was officially used as a timeless symbol of Edox and since then, it has been a proud part of the official Edox company logo.

**1955****A GROWING COMPANY**

At that time, Edox employed up to 500 watchmakers and the company moved into new, modern and larger production facilities. Edox was amongst Switzerland's leading watch companies.

1961
THE WATER CHAMPION

The famous “Delfin” timepiece was launched, featuring a double caseback, special protective gaskets and a specially invented double O’ring system, setting new standards of shock protection and water resistance.

1965
HYDRO-SUB

The revolutionary Hydro-Sub collection was launched, featuring the famous double O’crown patented Edox gasket for increased water resistance.

1970
THE FIRST GENUINE
WORLD TIME WATCH

This year saw the introduction of the world’s first truly global timepiece, the “Geoscope” watch. Covering all time zones, the watch provided timekeeping for almost 50 different cities around the world, as well as local time.

1998
WORLD RECORD STILL
UNBROKEN

Edox engineers and watch-makers developed the world’s slimmest calendar watch, the “Les Bémonts Ultra Slim” collection. The movement had a thickness of only 1.4 mm, which is a technical record still held by Edox to this day.

2010

THE TIMEKEEPER

Edox becomes the official WRC timekeeper and launches a new collection dedicated to rally drivers, true virtuosos of the tarmac, snow and ice, and to all devotees of the automobile and motor-racing world.

2013

THE REVIVAL OF AN ICON

Edox celebrates the revival of an icon with the launch of the new Delfin collection, an emblematic collection which was first launched in the 70's.

2016

Sauber F1® Team

Edox is the official Premium Partner of **Sauber F1® Team** and steps in the thrilling world of Formula 1.

A new collection dedicated to this prestigious partner is also launched in 2016. This partnership is a strong testimony of Edox's presence amongst the most renowned and active Swiss watch brands.

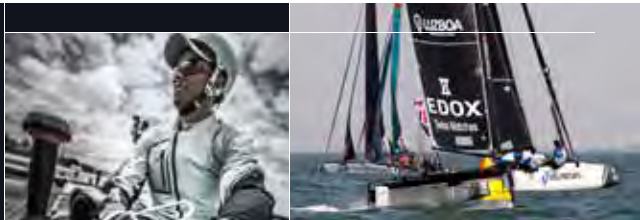

Grand Ocean collection is intrinsically linked to yachting and water world. It is also the emblematic watch of the Extreme Sailing Series™ championship, a stadium racing format involving Extreme 40 catamarans. These races are taking place from January to December on all seas of the globe.

Offshore pilots are real heroes of extreme water races.

They have to keep their nerves under all circumstances, have perfect timing reaction and ensure the perfect race and aim for the title. The speed sometimes reaches a breathtaking 270 km/h. What pilots often say is “What you see in front of you is already history”.

Olympian and world champion swimmer Mireia Belmonte thrives on passion - the passion to be the best of the best.

She's the perfect ambassador for the new LaPassion collection from boutique Swiss watchmaker Edox, a company that from its very beginnings in 1884 was forged by passion.

When master watchmaker Christian Ruefli-Flury made a pocket watch for his wife Pauline, she influenced him to set up his own watch making company - Edox. It was a decision fuelled by vision, expertise - and love.

More than 130 years' on, Edox brings its watchmaking passion, quality craftsmanship and superb engineering to the fore with the LaPassion collection.

And who better than to reflect the LaPassion philosophy than multiple world record holder Mireia Belmonte.

"Without passion there is no success," says the Spaniard, echoing the determination and emotion that led to the founding of Edox in the first place.

A wide-angle photograph of a winter landscape. The foreground is filled with a dense forest of evergreen trees, their branches heavily laden with snow. The trees are dark green, contrasting with the white snow. In the background, a valley is visible, partially obscured by a light mist or fog. The valley floor appears to be covered in snow, with some darker patches of land or trees visible. The sky is a pale, hazy blue, suggesting a clear but cold day. The overall scene is peaceful and serene, capturing the beauty of a winter day in a mountainous region.

Farmers in summer working the soil in the fields or breeding their cattle, our predecessors began working as watchmakers during the harsh winter months in order to make some money to sustain during the coldest period of the year.

Getting more and more professional and developing their skills, the former farmers slowly became highly skilled watchmakers.

EDOX
Maître Horloger - Les Bémonts
depuis 1844

The fascinating and unique engineering of the movement that eternally tracks the endless passing of time can be viewed via the open-worked for skeletonized dial.

For Edox has not only introduced new complications, a modern, yet classic-looking timepiece.

The case back of this 44-mm beauty is engraved with Christian Buehl-Furt's unique and individual serial number for each piece.

The Les Bémonts C.R.-F. Limited Edition is another beautiful creation from Edox, which began making watches back in 1844, and has been at the forefront of many horological developments, including:

- The revolutionary Duetto in 1961, water-resistant to 200m
- Introduction of the Hydrotank in 1995, water-resistant to 500m
- Launching a collection of sports watches in 2006 incorporating a range of cutting-edge materials derived from scientific research, such as ceramic, carbon and titanium

With the Les Bémonts C.R.-F. Limited Edition Edox adds a new chapter to its proud horological history to create a state-of-the-art - and indeed state-of-the-heart - timepiece.

A dark, atmospheric photograph of a snowy mountain landscape. In the foreground, a snow-covered slope leads up towards a traditional wooden house with a dark roof, partially visible on the right side. The background features rolling hills and distant mountains under a heavy, overcast sky. The overall tone is somber and evocative.

Edox homeland is the land of traditional watchmaking and is the crib of the modern watchmaking craftsmanship. Our land is rich of more than 400 years of history in watchmaking and our pride is to respect our elders' work and heritage.

MOVEMENTS

REFERENCE NUMBER SYSTEM

PICTOGRAMS

EDOX QUALITY

Batteries

In compliance with global regulations and standards, Edox equips its quartz timepieces with mercury-free batteries. This is a positive step towards environmental sustainability with no effect on the watch precision and efficiency.

Conformity

Every component coming into our production facility in Les Genevez in the Swiss Jura is checked to ensure its dimensions, aesthetics, quality and interchangeability.

Diamonds

Edox diamonds are carefully selected and matched not just according to carat value but also to cut, color and clarity. All diamonds are purchased from legitimate sources not involved in funding conflict and in compliance with United Nations resolutions. We guarantee that these diamonds are conflict free.

Edox double O-ring Crown or Pusher

Since the 70's, Edox has set specific quality and technical standards for ensuring the water resistance of diving timepieces. The double O-ring crown or pusher has been engineered by Edox to allow to increase the resistance to water pressure. Timepieces equipped with crowns or pushers featuring a double O-ring are featuring the special pictogram for easy understanding.

Helium Escape Valve

Some of our Chronoffshore-1 timepieces are equipped with a decompression system which allows helium to escape from inside the watch when worn for professional use in pressure chambers (long-term underwater work, crude oil exploration, etc).

The Edox helium valve opens and closes automatically. It is imperative that the models equipped with a non-automatic helium escape valve (such as older Edox timepieces) have the helium valve screwed back in order to guarantee their water resistance.

Leather

All Edox leather straps are specially cut, stitched and padded by expert craftspeople. Various ways of tanning provide different touch and feel for the straps made of cow or calf leather. It is always important to remember that colors and suppleness of leather are subject to change with time and exposure to external factors. Daily showers or swims are not recommended. If your consumers live a very active lifestyle, especially one involving frequent exposure to salt water and heavy perspiration, we recommend a steel bracelet or rubber strap.

Luminescence

This technology, branded under the name Super-Luminova, offers brightness in low-light conditions, thanks to a non-radioactive and non-toxic material like the tritium previously employed in the industry. Edox uses Super-Luminova for its highly functional attributes. It is applied on watch parts such as hands, numerals, bezel indices, etc.

Mother-of-pearl

Resilient, and iridescent, mother-of-pearl is integrated in many Edox dial designs. It is produced inside the shells of certain mollusk shells. This is why each dial made of mother-of-pearl is unique.

Movements

Exclusive mechanisms are also developed with renowned partners for special timepieces. Edox integrates exclusive Swiss-developed and Swiss-made electronic modules to power timepieces like the Chronorally.

Mechanical movement:

A mechanical movement undergoes several stresses in its life. To ensure it will remain functional and precise as long as possible, Edox simulates watch wearing in its own quality office for every single manual and self-winding mechanism.

PVD

Edox uses PVD coatings which is a high-performance pollution-free and non-allergenic technology also used in the aeronautic industry, is widely used in watchmaking. The process involves putting a fine titanium coating on stainless steel by condensing a metal vapor in a partial vacuum.

Rubber

Edox uses genuine high-grade rubber for its straps (a natural material and extremely comfortable). The rubber is silky finished and easy to maintain with the proper cleaning.

Sapphire crystals

100% of Edox timepieces are fitted with a scratch-resistant crystal that has been cut from a polished slice of solid sapphire. Each has a triple-coated anti-reflective treatment on the internal side for better legibility.

Stainless Steel

The 316L stainless steel alloy used in Edox cases and bracelets has strong anti-magnetic properties and is optimized for toughness and corrosion resistance. It is also a good choice for consumers allergic to nickels.

Titanium

Edox integrates this metal to some of its sports timepieces, as it is as strong as steel but 45% lighter and highly resistant to corrosion. The high tensile strength to density ratio makes it the ideal material for active lifestyles.

Visual and manual testing

In addition to our testing process, all timepieces are visually checked between each manufacturing step ensuring overall quality based on our own Edox standards. If a timepiece does not pass inspection, it is checked and repaired. It can only go back to the production phase if it has passed the quality check.

Free Dive World Champion Christian Redl recommends the following Water Resistance:

 Water-resistance

Edox watch cases are hermetically sealed using high-grade rubber gaskets and screwed-in casebacks to ensure that no moisture or dust comes in contact with the movement inside.

WATER RESISTANCE CLASSIFICATION

	Meters	Feet	ATM	All Edox timepieces are water-resistant from 30 to 1000 metres. Check the details on the back of your Edox timepiece and read the following instructions carefully.	Collection
